Task 4

Map your domain with your nginx web server.

1. Make sure Nginx is running

```
admin@ip-10-0-2-50:~$ exit
logout
Connection to 10.0.2.50 closed.
admin@ip-10-0-1-87:~$ sudo apt update
sudo apt install nginx -y
Get:1 file:/etc/apt/mirrors/debian.list Mirrorlist [38 B]

Add a new record
DNS records define how your domain behaves, like showing your website content and delivering your email.
Add New Record
Easily verify domain ownership
Need to verify ownership of your domain to connect to an external service? We've made it easier than ever.
Verify Domain Ownership
Create MX records
Quickly create MX records to connect your domain with email services.
Create Now
New Records
A records use an IP address to connect your domain to a website. They're also used to create subdomains such as www or store, that point to an IP address.
